- Durable stainless steel construction is easy to clean and suitable for restaurants, catering, buffets, and food trucks.

### Certifications

ETL, US & Canada

ETL Sanitation

## Technical Drawings

## Notes & Details

This food warmer is designed for keeping prepared hot foods warm and is not intended for cooking raw food. Always add water to the tank before use and keep the water level between the Min and Max lines to avoid dry heating. Place the unit on a flat, dry, heat-resistant surface, and do not move it while it contains hot water or hot food. Use compatible steam table pans only and avoid overfilling. Always turn off and unplug the unit before draining water, cleaning, or moving it. The tank, pans, water, and surrounding surfaces may become hot during operation, so use heat-resistant gloves when handling. Never immerse the electrical base or power cord in water.
