Hakka Commercial 10L Multifunction Meat Bowl Cutter Mixer and Buffalo Chopper Food Processor (HLQ-14)

AUTOMATIC FOOD CUTTING MIXER

Technical Data

Length	23.8"
Width	15.7"
Height	17.2"
Net Weight	119 LB
Gross Weight	150 LB
Pot volume	10L
Working Capacity	330lb/h
Material	Stainless Steel
Voltage	110V
Power	750W

Features

- Food Grade Material: Made entirely of stainless steel, with a high-hardness blade set and waterproof design for easy cleaning.
- Low Noise: Operates quietly and efficiently, with significant energy-saving benefits.
- Safety Designed: On/Off switch works only when the bowl cover is locked; features an S-shaped blade for high-speed, efficient chopping.
- Easy Cleaning: Removable bowl cover, knives, and bowl simplify the cleaning process.
- Versatile Use: Ideal for chopping meat and vegetables into stuffing or paste, with the capability to create smooth emulsions.

Certifications

ETL, US & Canada

ETL Sanitation

Notes & Details

The Hakka Chopper Machine leverages the high-speed whirling action of its chopping knife to efficiently cut meat pieces, shredded meat, and fat into meat stuffing or paste. Constructed entirely from food-grade stainless steel, it features a robust design with blade sets of high hardness, up to 52 degrees, ensuring durability and consistent performance. The machine's electric components are waterproof, well-sealed, easy to clean, and conform to international hygiene standards. Despite its powerful performance, it operates with low noise and high efficiency, offering remarkable energy savings. The synchronized speed of the chopping knife and pot results in short chopping times and minimal temperature increase of the material. Safety is paramount, with an on/off power switch that only operates when the bowl cover is securely locked in place. The "S" shape blade ensures high speed and efficiency, saving labor and time with its impressive rotation. The removable bowl cover, knives, and bowl make cleaning easy. This versatile machine is perfect for both meat and vegetables, capable of chopping, blending, and emulsifying ingredients quickly and effectively, making it ideal for commercial kitchens, butcher shops, and food processing plants.
